

Multiplexed Table Streaming Demo

This demo shows how to stream rows for multiple tables (e.g. A, B, C and Summary) even if data arrives interleaved, using disk-buffering to save RAM.

Key	Timestamp	Data
TOTAL	All Vehicles	Processed successfully

Key	Timestamp	Data
Vehicle A	10:001:00	Movement detected #1
Vehicle A	10:002:00	Movement detected #2
Vehicle A	10:003:00	Movement detected #3
Vehicle A	10:004:00	Movement detected #4
Vehicle A	10:005:00	Movement detected #5

Key	Timestamp	Data
Vehicle B	11:101:00	GPS update #1
Vehicle B	11:102:00	GPS update #2
Vehicle B	11:103:00	GPS update #3
Vehicle B	11:104:00	GPS update #4
Vehicle B	11:105:00	GPS update #5

Key	Timestamp	Data
Vehicle C	12:201:00	Status OK #1
Vehicle C	12:202:00	Status OK #2
Vehicle C	12:203:00	Status OK #3
Vehicle C	12:204:00	Status OK #4
Vehicle C	12:205:00	Status OK #5
