Highlights & Risks

GOOD

APAC Market Expansion Ahead of Schedule

The APAC team closed 3 enterprise deals in Q1, exceeding the annual target by 40%. Revenue from the region grew 62% YoY.

MEDIUM

Rising Customer Acquisition Costs

CAC increased 18% QoQ due to competitive pressure in paid channels. Current CAC: \$342 (target: \$290).

Empfehlung

Shift 20% of paid budget to organic content marketing. Invest in referral program expansion.

HIGH

Infrastructure Cost Optimization Needed

Cloud spending exceeded budget by 22% (\$48K overage). Primary driver: unoptimized staging environments running 24/7.

Empfehlung

Implement auto-scaling for staging environments. Schedule non-production resources to shut down outside business hours.
